

Fallingwater

## Lectures

Add on one of our Curator's Choice Lectures for your group to enjoy during your visit.

Approximately 45 minutes in length, these talks are aimed at an adult audience, but are also suitable for college and high school students. Please allow a total of 1 hour for each lecture, including time to move the group on site, time for seating, actual lecture time, etc.

### **Fallingwater Structure: Why Fallingwater Isn't Falling Down**

A discussion of the history of the house, the origins of the architectural and engineering concepts and the architect client relationship provide the opening for this lecture. Then the question of why Fallingwater isn't falling down is answered as you explore the process of discovering and evaluating the structural issues at Fallingwater and creative ways of remediating them without compromising the historic significance of the structure or site.

### **The Art of Fallingwater: The Kaufmanns Collection in Context**

Spend time viewing the Kaufmann family's collection of art in the context of their department store and vacation home, Fallingwater. This lecture covers many portions of the Kaufmann Family collection that is part of the Fallingwater experience. Works by Rivera, Magaña, Velasco, Pribble, Picasso, Hiroshige and Audubon will be shown as part of this art collection retrospective.
